Australian  
Native Plants

A Plant for Every Purpose

NINDETHANA NURSERY

Dripstone, N.S.W., Australia

G. W. ALTHOFER, Proprietor.

PHONE 7, DRIPSTONE.

# S. O. S.

---

## SEED OF FOLLOWING SPECIES URGENTLY REQUIRED.

---

TASMANIA: *Eucalyptus cordata*; *Melaleuca squarrosa*; *Mel. gibbosa*; *Mel. squamea*; *Pomaderris elliptica*; *Cyathodes glauca*; *Prostanthera lasianthos*; *Dacrydium Franklini*; *Acacia verniciflua*; *Gaultheria hispida*; *Drymophila cyanecarpa*; *Cyathodes acerosa*; *Anopterus glandulosum*; & *Wahlenbergia saxicola*.

WESTERN AUSTRALIA: *Thysanotus multiflorus*; *Blancoa canescens*; *Grevillea pilulifera*; *Hakea ruscifolia*; *Marianthus candidus*; *Pronaya elegans*; *Byblis gigantea*; *Acacia nervosa*; *Hibbertia montana*; *Pimelea physodes*; *Balaustion pulcherrimum*; *Darwinia Meeboldi*; *Leschenaultia formosa*; *Grevillea Thelemanniana*; *Grevillea asparagoides*; *Grev. Huegeli*; *Grev. Endlicheriana*; *Grev. pulchella*; *Hakea obtusa*; *Melaleuca calathamnoides*; *Melaleuca exarata*; *Melaleuca Huegeli*; *Calothamnus gracilis*; *Eucalyptus gamophylla*; *Euc. diptera*; *Euc. Woodwardi*; *Euc. Rameliana*; *Euc. xanthonema*; and *Euc. Drummondii*.

NORTHERN AUSTRALIA (including N.W. Aust., N.T. & N.Q.): *Grevillea refracta*; *Acacia Bynoeana*; *Eucalyptus miniata* and *Euc. phoenicea*.

SOUTH AUSTRALIA: *Eucalyptus Landsdowneana*; *Grevillea aspera*; *Hibiscus Wrayi*; *Acacia papyrocarpa*; and *Acacia anceps*.

N.S.W.: *Acacia pendula* (Weeping Myall); *Duboisia Hopwoodii*; (Pituri); *Flindersia maculosa* (Leopard Tree); *Hakea purpurea*; *Halgania lavandulacea*; *Halgania strigosa*; *Prostanthera striatiflora*; *Prostanthera microphylla*; *Prostanthera saxicola*; *Jacksonia scoparia*; *Grevillea acanthifolia*; *Grevillea asplenifolia*; *Grevillea punicea*; *Grevillea sericea*; *Acacia hispida*; and *Citriobatus multiflorus*.

QUEENSLAND: *Brachychiton rupestris*; *Acacia Dietricheana*; *Acacia Simsi*; *Alstonia constricta*; and *Ixora coccinea*.

VICTORIA: *Pultenea rosea*; *Astroloma conostephioides*; *Boronia pilosa*; *Baeckea ramosissima*; *Calectasia cyanea*; *Dodonea procumbens*; *Dampiera lanceolata*; *Prostanthera hirtula*; *Viola hederacea*; *Viola betonicifolia*; *Tieghemopanax sambucifolius*; and *Grevillea Williamsoni*.

---

Seed of any of the above will be welcome and purchased for cash, or plants given in exchange.

# SUPPLEMENTARY CATALOGUE, 1944

Customers, please note:—My 1943 Catalogue of 28 pages, containing particulars of about 400 species of Australia's loveliest wildlings, is still available post free on application.

## ACACIA (Wattle)

- ARGYROPHYLLA: Attractive dry-area shrub with silvery leaves.  
8 feet ..... 1/9
- ASPERA: Compact bush. 3 to 6 feet ..... 1/6
- BRACHYBOTRYA: Silver-leaved Mulga. 4 to 8 feet. Native  
of dry areas ..... 1/9
- CARDIOPHYLLA: Wyalong Wattle. Undoubtedly one of the  
loveliest of the genus. Long arching branches, dainty,  
softly pubescent leaflets and masses of deep, golden  
flowers in spring. 10 feet ..... 2/-
- CONTINUA: Very dwarf, rigid shrub. Dry position. 1 to 2  
feet ..... 2/-
- DODONEAFOLIA: Tall spreading shrub. Flower-balls large,  
golden. 15 feet. .... 1/9
- DRUMMONDI: Lovely W.A. species, with pinnate leaves and  
long finger flowers. 4 to 5 feet. .... 2/-
- KEMPEANA: Dry area shrub, S.A. .... 1/9
- MICROBOTRYA: Tall shrub from W.A. 8 to 12 feet. .... 1/6
- RETINODES: "Wirilda." Ever-blooming wattle. 12 to 20 ft. 1/6
- RICEANA: Handsome shrub from Tasmania. 8 to 10 feet. 1/9
- SOWDENI: Attractive dwarf from dry areas. .... 1/9

## ACTINOSTROBUS

A small coniferous group, confined to W.A. Compact small trees, revelling in sandy or light soils.

- GLAUCUS: Striking glaucous-leaved small tree. 10 to 15 ft. 2/-
- PYRAMIDALIS: Dense and low-branched small tree. 6 to  
10 feet ..... 2/-

## BANKSIA

- BAXTERI: Tall shrub from W.A., with large yellow flower  
spikes ..... 2/6

## BIGNONIA

- JASMINOIDES: Fine glossy-leaved climber for temperate  
clime ..... 2/-

## CALLITRIS

- VERRUCOSA: Low-branched conifer from the dry areas of this  
State ..... 2/-

## CALYTHRIX

- BREVIFOLIA: Small shrub with pink flowers, from W.A. .... 2/-  
 TETRAGONA: Fine shrub for dry conditions. White or pink  
 flowers. 5 feet ..... 2/-

## CASUARINA

- HUEGELLIANA: Elegant small tree from W.A. .... 1/6  
 TORULOSA: Small tree of pleasing appearance ..... 1/6

## CLEMATIS

- PUBESCENS: Creeper with attractive flowers from W.A. .... 2/-

## DODONEA

- ATTENUATA: Small shrub from W.A., with attractive seed  
 vessels. 2 feet ..... 2/-

## DRYANDRA

- NOBILIS: One of the living fossils. Strange Banksia-like shrub  
 from W.A. 4 to 7 feet ..... 3/6

## EUCALYPTUS

- ACCEDENS: "Powder Bark." Attractive tree. 50 to 60 ft. 1/9  
 AFFINIS: Spreading tree. 40 to 80 feet ..... 1/6  
 AGGREGATA: "Black Gum." 40 to 60 feet ..... 1/6  
 BAUERIANA: Medium sized tree for good soil locations on coast  
 and slopes. .... 1/6  
 BOSISTOANA: Tall tree for rich soils in mild climates ..... 1/6  
 COCCIFERA: Attractive ornamental from Tasmania. 10 to  
 20 feet ..... 1/9  
 CONICA: Graceful pendulous tree. 30 to 50 feet ..... 1/6  
 CORDIERI: Very ornamental and hardy species. 40 feet ..... 1/6  
 CORNUTA: "Yate." Valuable timber tree. W.A. .... 1/6  
 FOECUNDA: A mallee of the sandstone and limestone ridges. 1/6  
 GOMPHOCEPHALA: Tall tree. Valuable timber. For coast, in  
 light soils. 50 to 100 feet ..... 1/6  
 GRIFFITHSI: Handsome small ornamental for saline soils.  
 30 feet ..... 1/6  
 GROSSA: One of the very best dwarf shrubs, with large leaves  
 and yellow flowers. Slow grower. 6 to 8 feet ..... 2/-  
 HAEMASTOMA: Useful shade tree for sandstone areas. 30  
 to 40 feet ..... 1/6  
 INCRASSATA: A handsome mallee for barren sandy soils, in low  
 rainfall areas ..... 1/9  
 KIRTONIANA: Useful tree for moist saline situations. 40 to  
 50 feet ..... 1/6  
 KITSONIANA: A dwarf tree for moist, boggy soil, in alpine  
 regions. 20 to 30 feet ..... 1/6  
 LEPTOPODA: A slender mallee for low rainfall areas. 6 to  
 12 feet ..... 1/9

## EUCALYPTUS (Continued)

|               |                                                                         |                |     |
|---------------|-------------------------------------------------------------------------|----------------|-----|
| LINEARIS:     | Slender, graceful tree for cool climates.                               | 30 to 40 feet  | 1/6 |
| LONGIFOLIA:   | Large, spreading tree for deep soils                                    |                | 1/6 |
| LOXOPHLEBA:   | Useful tree for granite soils.                                          | 20 to 45 feet. | 1/6 |
| MACARTHURI:   | Spreading tree. Important source of valuable perfume.                   | 40 to 80 feet  | 1/6 |
| MACRANDRA:    | Fine semi-dwarf breakwind tree. Hardy.                                  | 15 to 25 feet  | 1/6 |
| MACULOSA:     | "Red Spotted Gum."                                                      | 30 to 50 feet  | 1/6 |
| MELANOPHLOIA: | Lovely silver-leaved tree from Western N.S.W.                           | 40 feet        | 1/6 |
| MUELLERIANA:  | A large Stringybark for clay soils.                                     | 50 to 100 feet | 1/6 |
| MULTIFLORA:   | "Swamp Mahogany."                                                       | 40 to 60 feet  | 1/6 |
| NEGLECTA:     | Rare Omeo Gum. Shrubby ornamental.                                      | 10 to 20 feet  | 2/- |
| OBTUSIFLORA   | var. dendromorpha: Dwarf mallee for barren sandstone areas              |                | 1/6 |
| OREADES:      | "Blue Ash."                                                             | 40 to 100 feet | 1/6 |
| OVATA:        | Swamp Gum. Tall tree. Useful on swampy ground.                          |                | 1/6 |
| PANICULATA:   | Large tree for coast and slopes                                         |                | 1/6 |
| PAUCIFLORA:   | "Cabbage Gum." Stands extreme cold.                                     | 20 to 50 feet  | 1/6 |
| PILLIGAENSIS: | Shade tree for dry areas.                                               | 20 to 50 ft.   | 1/6 |
| POLYANTHEMOS: | "Red Box." Spreading tree.                                              | 40 feet.       | 1/6 |
| RADIATA:      | Spreading tree.                                                         | 40 to 60 feet  | 1/6 |
| RESINIFERA:   | Large tree for light sandy soils on coast                               |                | 1/6 |
| RISDONI:      | Lovely silver-leaved tree for cool and cold climates.                   | 10 to 20 feet  | 2/- |
| RUDIS:        | Spreading tree.                                                         | 30 to 50 feet  | 1/6 |
| SARGENTI:     | Good tree for sandy, saline soils. Medium growth                        |                | 1/9 |
| SIDEROPHLOIA: | Broad-leaved Ironbark.                                                  | 50 to 100 feet | 1/6 |
| SMITHI:       | Large tree for alluvial flats. Height to 150 feet                       |                | 1/6 |
| STELLULATA:   | Spreading tree. Stands severe frosts.                                   | 20 to 50 feet  | 1/6 |
| STOWARDI:     | Large-flowered, dwarf mallee. Yellow                                    |                | 2/- |
| STUARTIANA:   | "Apple Box." Spreading tree.                                            | 50 feet        | 1/6 |
| TRIANTHA:     | Large tree for coastal areas                                            |                | 1/6 |
| UNCINATA:     | A mallee for hot, dry areas. Useful for reclamation work in sandy soil. | 4 to 10 feet   | 1/9 |
| VITREA:       | Large tree with pendulous branches for cold, bleak conditions           |                | 1/6 |
| WANDOO:       | (Syn. E. redunca var. elata): Large tree.                               | 50 to 100 feet | 1/6 |

We have 160 species of Eucalyptus in stock this season. What species grow naturally in your district? Particulars of local flora are at all times welcome.

## GMELINA

LEICHHARDTI: White Beech. Tall tree for warm coastal regions ..... 2/6

## HAKEA

ERINACEA: Erect shrub with pink flowers. 2 to 3 feet ..... 2/6

SUAVEOLENS: W.A. species. 5 to 7 feet ..... 2/-

UNDULATA: Leaves attractively veined. Hardy. Cream flowers. 6 to 8 feet ..... 2/-

## HARDENBERGIA

COMPTONIANA ROSEA: Rose-flowered form of the common blue W.A. species. Hardy creeper ..... 2/-

## HIBBERTIA (Guinea Flower)

OBTUSIFOLIA: Lovely little plant for dry, rocky situation. Flowers for months. Yellow. 2 feet ..... 2/-

## KUNZEA

RECURVA: Spreading bush, 3 to 4 feet high, with pale mauve flowers in spring ..... 2/-

## OLEARIA (Daisy Bushes)

ACULEATA: Many-flowered dwarf from the dry areas of N.S.W. Pale blue or white flowers in autumn or winter. 2 feet ..... 2/-

FLAVESCENS: Medium height. Yellow flowers ..... 2/-

RETUSA: Perennial, with large blue flowers. 2 to 3 feet ..... 2/-

## PELARGONIUM

RODNEYANUM: Prostrate plant for rock crevices ..... 2/-

## PROSTANTHERA

SPINOSA: Slender, small shrub with lilac flowers ..... 2/-

## TELOPEA

OREADES: Victorian Waratah. 20 to 30 ft. Red flowers. 2/6

## XYLOMELUM (Woody Pear)

PYRIFORME: Small, slender tree for mountains and coast in temperate clime. Venation of leaves is particularly fine. 10 to 15 feet. .... 3/6

## **FREIGHT AND POSTAGE**

Freight and postage are extra and must be added to all remittances. Or freight payment may be made at receiving end if desired. Kindly add exchange to all cheques.

## **PACKING CHARGES**

Owing to high cost and increasing scarcity of materials, a small charge is made for all consignments. This usually amounts to from 1/6 to 2/- for each two dozen plants.
